EXPNO:26 Insert Watermark Using OpenCV Aim

To insert a watermark text into an image using OpenCV.

Algorithm

1. Import the OpenCV library.
2. Read the input image BEN 10.png.
3. Check whether the image is loaded successfully.
4. Define the watermark text.
5. Select the font, position, size, and color of the watermark.
6. Use cv2.putText() to add the watermark to the image.
7. Display the original and watermarked images.
8. Save the watermarked image.
9. Close all windows CODE:

```
EXP-26.py - C:/Users/POORNA SKHT/OneDrive/Tài liệu/computer vision ita0502/lab experim...
File Edit Format Run Options Window Help

# Read the image
img = cv2.imread("BEN 10.png")

# Check if image is loaded
if img is None:
    print("Image not found!")
    exit()

# Watermark text
watermark = "BEN 10"

# Font
font = cv2.FONT_HERSHEY_SIMPLEX

# Position of watermark
position = (30, 50)

# Font size
font_scale = 1

# Color (White)
color = (255, 255, 255)

# Thickness
thickness = 2

# Add watermark
cv2.putText(img, watermark, position, font,
            font_scale, color, thickness)

# Display image
cv2.imshow("Watermarked Image", img)

# Save image
cv2.imwrite("watermarked_BEN10.png", img)

cv2.waitKey(0)
cv2.destroyAllWindows()

print("Watermark added successfully!")
```

Ln: 11 Col: 0

OUTPUT :

```
*IDLE Shell 3.13.3*
File Edit Shell Debug Options Window Help
Python 3.13.3 (tags/v3.13.3:6280bb5, Apr 8 2025, 14:47:33) [MSC v.1943 64 bit (AMD64)] on win32
Enter "help" below or click "Help" above for more information.
>>>
= RESTART: C:/Users/POORNA SKHT/OneDrive/Tài liệu/computer vision ita0502/lab experiments/EXP-26.py
```

Result

The watermark text "BEN 10" is successfully inserted into the image, and the watermarked image is saved as watermarked_BEN10.png.
